INTEGRIS Management Group, LLC

Integris Management Group, LLC, provides project and construction management, project controls, 3D visualization, document development, and IT consulting services. A CUCP-certified **DBE** and California **UDBE**, INTEGRIS is certified by Los Angeles Metro as an **MBE**, **WBE**, **SBE**, and **DBE** firm. The firm is also recognized as a Los Angeles County **CBE**. **INTEGRIS** features professionally registered engineers and licensed architects well versed in providing construction inspection services as well as managing construction projects of any size, LEED-accredited professionals, and specialists in the fields of 3D rendering, scheduling, cost estimating, document control, writing, editing, and graphic design. **INTEGRIS** staff members have decades of experience delivering successful projects in a variety of delivery methods including traditional and design-build.

Program and Construction Management: Integris provides program and construction management professionals to serve as Project Managers, Owner's Representatives, Construction Managers, Resident Engineers, and Inspectors with expertise in both horizontal and vertical construction including highways and bridges, passenger transit, wastewater, and facilities and structures for largely public clients. Our management staff includes registered professional engineers in the fields of civil, structural, and mechanical as well as LEED-accredited professionals. Each has in-depth knowledge in his/her areas of expertise. Our professionals provide expert advice and comprehensive management at any and every stage of a project from early planning through the warranty period. Integris construction project managers align themselves closely with our project controls specialists to ensure that the tools and expertise are in place to minimize risk and position each project to complete on time, within budget, and meet the design intent. Our trained personnel utilize open communication and dispute resolution techniques to minimize conflict and promote a team atmosphere. Integris project controls services include CPM scheduling, cost engineering, document control, and implementation and maintenance of enterprise project management software solutions.

3D Visualization: We provide high-quality, state of the art 3D visualization services to the architecture, engineering, and product design and development industries. When a current or potential project could be enhanced by a still or moving visualization of a project in its yet to be built environment, we work directly with technical and management staff to clearly understand the design concepts, engineering requirements, and architectural features that are then formulated effectively into a three-dimensional visual of the project.

Our products are used for public meetings, proposals to public agencies and private developers, and on web sites featuring available products and requiring interactive graphics.

Document Development and Graphics Design: The INTEGRIS team includes technical writers, editors, desktop publishers, and graphic designers available to assist in progress reporting; public outreach material preparation; report, specification, proposal, qualifications, presentation, brochure, and other document preparation services. Our in-depth knowledge and experience of the transportation design and construction industries is reflected in the quality of the documents we produce. Our staff members are fluent in the complete array of document development services, from concept to writing, commissioning photography, and printing.
